BURGLARY PROTECTION PACKAGE.

KEEP BURGLARS OUT AND **PREVENT MANUAL ATTACKS** ON YOUR ENTRANCE

The demand for burglar-resistant doors in both public and private buildings worldwide is growing. According to police statistics, a burglary takes place every couple of minutes. Our advanced RC3 certified shield doors provide you with the peace-of-mind you need, knowing we have rigorously tested them to guarantee the ultimate protection.

OVERVIEW

Studies have shown that 90% of all burglars are opportunists, taking advantage of inadequate security of a building. They are usually not focused on specific objects, but instead strike as soon as they have identified an opportunity to walk off with their stolen inventory within a short amount of time.

The duration of a burglar attempt usually takes no longer than five minutes and in only one of every 100 cases is access obtained by breaking the glass panels. These findings have led to the development of measures throughout the building industry to slow down burglar attempts and to protect buildings against intruders.

ADVANCED SHIELD SECURITY DOORS

Our burglar resistant RC3 shield doors are ideal for situations where the entrance and facade are an integral part of the security system and a high degree of burglary-resistance is required. In combination with the added safety and security, our doors retain the benefits of a revolving door, like energy saving and draft reduction. In many cases a manual attack resistant entrance is even requested directly by the insurance companies themselves. This type of protection package reduces the risk of valuable inventory being stolen and minimises the chance of collateral damage in the process.

CERTIFIED CLASS 3 BURGLARY RESISTANCE

We offer approved Class 3 Burglary Resistance packages for both our revolving door solutions and our high security doors and portals, as outlined opposite:

The Tourniket Revolving Door Protection Package

Due to the large diameter range from 1600 to 3800 mm and variety of configurations you will often find our Tourniket in offices, hotels, supermarkets and many types of public buildings.

Key Features:

- ✓ Shield doors with protected multiple locking points
- ✓ Stainless steel floor guide, reinforced profiles and hi-impact resistant glass to guarantee the integrity of the construction during burglar attempts
- ✓ Fully automated and remotely controlled

The Circlelock High Security Portal Collection Protection Package

Another burglar resistant package has been developed for our high security portals, the Circlelock Combi and Circlelock Solo. This interlocking booth prevents unauthorised entrance to secured areas using several verifications systems. The heavy duty manual attack resistance construction contributes to an even higher security level. The Circlelocks are usually found in government buildings, banks, datacentres and airports.

Key Features:

- ✓ Dead bolt locking of the outer door panel
- ✓ Stainless steel floor guide, reinforced profiles and hi-impact resistant glass to guarantee the integrity of the construction during burglar attempts

For information and key features for our other compatible products, please speak to your entry expert.

COMPLIANCE

The manual attack protection packages have been certified to comply with applicable international standards EN1627 and EN356 and are certified by an accredited test institute. The standard specifies requirements and testing methods of burglar resistance constructions for pedestrian doors, windows, facades, grilles and shutters. The results of the tests are evidenced by official certificates.

KEY BENEFITS

- ✓ Automated and remotely controlled for convenient operation
- ✓ Instant switching between day, night and secured operating modes
- ✓ Secured passage combined with RC3 locking
- ✓ Instant lockdown feature (protests, riots and terror threat situations)
- ✓ Automated winter position to increase energy saving and comfort level inside (for off-peak times)
- ✓ Save money on insurance premiums

COMPATIBLE PRODUCTS

- ✓ Tourlock 180
- ✓ Circlelock Solo
- ✓ Circlelock Combi
- ✓ Tourniket
- ✓ Tournex
- ✓ Twintour
